JR and PRO*

QUESTION:

Can reports be automated by email?

ANSWER:

Yes you can automate a detail or summary report by email.
The reports will generate and send without user intervention.

The utility mail_setup10.exe sets up the report.
The utility auto_email10.exe sends the report using the settings you configure in mail_setup10
You can also use auto_detail_email10.exe to send the detail report, or auto_summary_email10.exe to send the summary report.
